EDUCATION

University of Colorado Denver **GPA: 3.90**

Bachelor's in Computer Science, Minor in Information Systems *Expected May 2027*

Relevant Coursework: Algorithms, Data Structures, Computer Networks, App Development, Object-Oriented Programming, Discrete Structures, Database Management, System Strategy/Architecture & Design, Logic Design

SKILLS

- **Languages:** TypeScript, JavaScript, Python, Java, C++, HTML, CSS, SQL
- **Frameworks & Libraries:** Next.js, React.js, Tailwind
- **Developer Tools:** Git, GitHub, Vercel, Android Studio, Jupyter, Tableau, MongoDB

EXPERIENCE

CU Denver College of Engineering **Denver, CO**

Teaching Assistant *August 2025 - Present*

- Advised 8 project teams (40+ students) through semester-long design projects, providing iterative feedback via Canvas - helped achieve an 88% average, one of the highest across all sections.
- Guided teams through the DI framework (discover, define, develop, and deliver), helping groups ideate, prototype, and present original product concepts based on a structured design process.
- Held 10+ hours of office hours and class sessions (4x/week), grading deliverables against course standards.

TRIO SSS & McNair Scholars **Denver, CO**

STEM Peer Mentor *December 2024 - Present*

- Mentored 165+ first-generation, low-income, and students with disabilities through academic planning, course selection, and college navigation as part of a federally funded student success program.
- Conducted 50+ one-on-one mentoring meetings per semester, documenting academic progress per federal program requirements to ensure mentees maintained scholarship eligibility.
- Assisted with skill-building workshops, supporting the program's retention rate of 2x the institutional average.

PROJECTS

SnowPost | Next.js, MongoDB, Clerk, TypeScript, Tailwind | Live

- Developed a full-stack social media platform with a Next.js frontend, MongoDB database, and Clerk authentication, using modular React components and server actions to handle data fetching and form validation.
- Implemented user onboarding, profile management with image uploads, threaded posts with nested comments, and real-time user search, deployed to production on Vercel.

AI Article Summarizer | React, JavaScript, CSS, Gemini API, Chrome APIs | Live on Chrome Web Store

- Built and published a Chrome extension to the Chrome Web Store, reaching 150+ impressions and 90+ installs, that summarizes any webpage in brief, detailed, or bullet point modes via user-provided Google Gemini API keys.
- Set up secure API key storage using Chrome's sync storage and a light/dark mode settings panel.

Galaxy Generator | Three.js, WebGL, JavaScript, HTML, CSS | Live

- Customized an open-source Three.js galaxy renderer, adding parameter controls for particle count, size, spiral arms, spin direction, color gradient, and randomness using lil-gui - deployed live on Vercel.

LEADERSHIP & COMMUNITY INVOLVEMENT

S-STEM Engineering Learning Community **Denver, CO**

Mentor Fall 2023 - Spring 2025

- Conducted recurring one-on-one mentorship meetings with first-year engineering students, providing academic guidance and support through CU Denver's federally funded S-STEM learning community.
- Presented a co-authored research poster at a national S-STEM conference in Chicago, connecting with S-STEM scholars, mentors, and faculty from universities and institutions across the country.
- Participated in volunteering events to support student engagement and engineering program outreach.
